

ATTENTION!

**Agility, Flyball, Lure Course, Herding, Obedience, Earth Dog,
Disc Dog & All Active Canine Companions**

**Canine Athletics & Core Strengthening Seminar
with Dr. Julia Moore
June 25th, 2011
From 9am to 4pm**

This is the seminar you don't want to miss!

We love our canine partners, and we love competing, hiking and playing sports with them. Unfortunately, the same as human athletes, they are not immune to injuries.

How can we get the very best performance from our dogs while protecting them from injuries?
What is proprioception and what does it mean for my canine athlete?

Dr. Julia Moore, Certified Canine Rehabilitation Therapist, will answer those questions and others during the seminar for canine athletes and their people. This will be a working seminar with dogs and handlers learning exercises on the floor as well as on the physio-ball. You will learn how to build core strength, develop flexibility, balance and coordination.

Discussion Topics:

- Injury prevention
- Age appropriate training
- Care of the canine athlete
- Balancing the athletic training plan to optimize physical fitness
- Advances in canine sports medicine and rehabilitation from injuries

REGISTRATION

Name _____ Email: _____ Phone: _____

Address _____ State/Zip _____

Dogs Name: _____ Breed: _____ Age: _____

What dog sport(s) do you do with your dog: _____

Please check one: Working dog \$65 ____ (limited to 12 dogs) Audit \$ 40 ____ (unlimited)
